

# Become a clinical quality improvement leader

## What is CQIP?

CQIP is a 10-month course designed to build capability in leading improvement work, with a focus on clinical quality improvement (QI) projects.

### CQIP is for you if you want to:

- Facilitate successful clinical QI initiatives in your own setting
- Support practice/organizational, regional or provincial initiatives focused on clinical improvement
- Deepen your knowledge of measurement for improvement with a focus on variation and statistical process control
- Develop your ability to lead, nurture, and engage teams in improvement

## Who should participate?

CQIP is designed for actively practising physicians and clinicians in a clinical context or setting from across Saskatchewan, including non-physicians and teams. CQIP is for all care settings — including long-term, community, acute and primary care.

While participants do not require previous QI experience to take this program, some exposure is recommended.

### Applications are reviewed and evaluated based on the selection criteria. Applications will be reviewed with a focus on:

- Participant information
- Participant's chosen clinical problem
- Organizational support for project

## CQIP components

Program components include both theory and experiential learning, along with individual coaching and a community of practice, such as:

- Guided preparations and course pre-work
- Flipped classroom learning
- Action periods
- Coaching support

## Program aims

### Program graduates are skilled in:

- Leading and facilitating clinical QI projects
- Working as internal consultants on clinical QI work
- Teaching clinical improvement tools and methods to others

To achieve these aims, the program is organized around four key themes:
