Vision, Mission, Values and Philosophy of Care

VISION

Healthy People, Healthy Saskatchewan

MISSION

We Care.

We work together to improve health and well-being; every day, for everyone.

VALUES

- **COMPASSION:** *We are caring.* We practice empathy. We listen actively to understand each other's experiences.
- **ACCOUNTABILITY:** *We are responsible.* We own each action and decision. We are transparent and have the courage to speak up.
- **RESPECT:** *We are collaborative.* We treat everyone with kindness, dignity, and empathy. We honour diversity and value each person as an individual.
- **EQUITY:** *We are committed to health equity.* We recognize that factors such as geographic location, culture, and background are key determinants of health outcomes. We embrace the diversity of our teams, and work to remove barriers to ensure all Saskatchewan residents and communities can access high-quality care.
- **SAFETY:** *We are aware.* We commit to physical, psychological, social, cultural and environmental safety. Every day. For everyone.

PHILOSOPHY OF CARE: Our commitment to a philosophy of Patient and Family Centred Care is at the heart of everything we do and provides the foundation of our values.

Objectives

Share the origin of a crisis and community outreach program

Outline the clinical models to inform the design

Report on the outcomes and impacts of the program

Consider the future of the design

Unexpected beginnings

Where it all began

- Temporary pause in services
- Knowledge Exchange from Southeast
- *“exceptional barriers and elevated risks”*

Phase 1

Early efforts

Saskatchewan
Health Authority

saskhealthauthority.ca

Getting Started

2021-2022

Team	# of FTE	Population of SAG	Mental Health and Addictions ED visits in 2021-22	Ranked among all hospitals in Saskatchewan	Ranked Among Rural hospitals in Saskatchewan
Swift Current	4.5	21,311	965	10 th highest	6 th highest
Moose Jaw	2.2	38,887	1285	7 th highest	3 rd highest
Kindersley	1.2	9,801	315	23 rd highest	18 th highest

Crisis Resolution Team

Referrals and Access

How quick and easy it is to refer to the CRT

Who can refer, early discharge

Content and Delivery

Assessment, provision of information to service users and carers

Medication, physical health, psychological interventions, social and practical problems

Staff and Team

Staffing levels, multi-disciplinary teams,

Risk assessment, communication,

Location and Timing

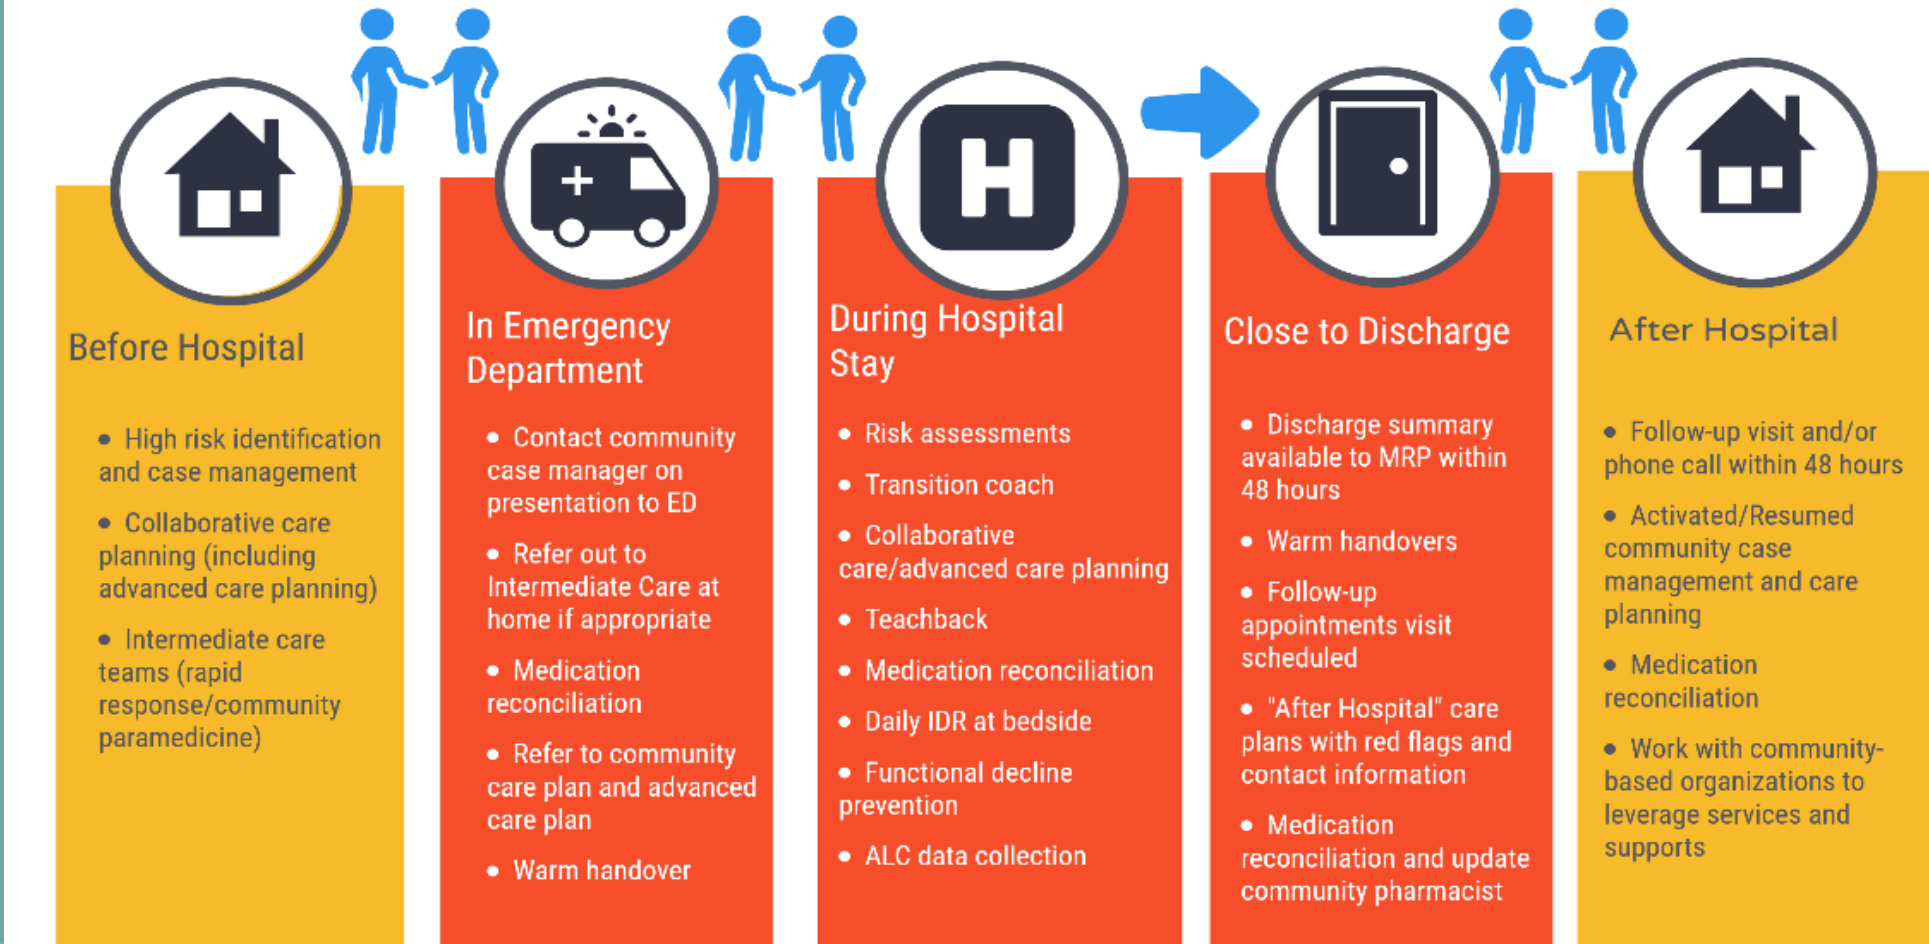

Alternatives to hospital admission,

Frequency of visits and location of visits

High Quality Care Transitions

Bridging the Gap between Community and Hospitals through Focused Process Improvement

Before Hospital

Community and Clinical Referrals

“exceptional barriers and elevated risks”

Before Hospital

Community and Clinical Referrals

- All teams use a “FACT Board” to deliver services
- Ranges from 15 - 35 people at a time (1:10 per FTE)

Diagnosis/ Presenting Issue/ Addiction	Other Involvement	LOCUS Level	Risk Factors	Interventions	Notes	Individual Social Network	Planner					Primary Case Manager
					TO DO:		M	T	W	T	F	
Substance use and mood	Joanne	3		Risk management and Medication Management	ER		attempt to contact	attempt to contact	Dec.3/25 @ 10 PC	attempt to contact		
behavior, mood	Brooke	3 Youth		Risk management and Medication Management	MHIPU			Dec.9/25 @ 1:30 HV				

In the Emergency Department

Rapid Response

- Teams are deployed directly to ER or follow up with a patient within 24 hours of discharge
 - ***28% of referrals come from ER***

In the Emergency Department

Rapid Response

- No embedded mental health and addiction supports in the ED’s at any of the sites we support
- When patient presents, nursing responds asap

Med LOS by Hours

Site	2023-24	2024-25
Swift Current	2.82	2.62
Moose Jaw	4.90	4.55

During the Hospital Stay

Bed side intervention

- ***33% of referrals come from inpatient units***
- ***Bed-side response*** and consultation have been critical to engage at risk patients

During the Hospital Stay

Bed side intervention

- Team provides assessment, brief treatment and connection to support services
 - In Swift Current, addictions programming is available on site

Close to Discharge

Getting Ready to come home

- Teams focus shifts to the ***8 domains of discharge support***
 - Medication Safety
 - Shared decision Making
 - Self-management and Health Promotion
 - Coordinated Transitional Planning
 - Timely Follow up for Post-Transition Monitoring
 - Social Community Support
 - Information Flow
 - Functional Decline Prevention

Saskatchewan
Health Authority

saskhealthauthority.ca

Close to Discharge

Getting Ready to come home

- In Swift Current, daily huddles occur between teams off site in rural areas to ensure proactive and comprehensive discharge support
- Inclusion in patient rounds, when possible, at various sites

After Hospital

Follow up at home

Year one measure

- ‘60 day follow up’ used to determine long term impact
 - 83% (N=315) of patients were in clinical services with MHAS
 - Of the 16% (n= 51) that were not in care at follow up:
 - **36 were considered “Treatment Complete”**
 - 15 were ‘Treatment discontinued’ (i.e. failed to show and unable to contact)
 - Only 19 of 315 participants were readmitted to hospital for care after discharge (6%)

...and now the numbers
